Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Amendment

This action is in response to Applicant's amendment filed May 30, 2006. Claims 1-22 are pending in the present application.

Declaration Under 37 C.F.R. 1.131

The evidence submitted is sufficient to establish a reduction to practice of the invention in this country or a NAFTA or WTO member country prior to the effective date of the Hayashi (US 2001/0054074) reference.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-17 are rejected under 35 U.S.C. 102(e) as being USPN 6,230,197 by Beck.

Examiner noted that claims 1-17 recited a method apparatus and program for utilizing an electronic messaging system for delivering media object, by sending an address or location of the object, for the message recipient, to retrieve said object.

Art Unit: 2143

Although, the claims were presented in various forms, but they are not distinct from convention electronic mail and attachment, which were used to send media object separately from the e-mail in order to minimized network bandwidth utilization.

In addition, there are several analogous arts, which are applicable for statutory rejection, specially, Beck, which clearly teaches a method, apparatus and computer program (hereinafter collectively referred to as a system), for communicating electronic message and media component, from e-mail server or e-mail server having vocal capability, e.g., voice mail server. By using character code, i.e., reference, the system allows its recipients to retrieve and utilize the attached media object, in real time. Further the message and media reference are stored separately from media components (figures 1 and 9; abstract; col. 9, lines 39-51).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 18-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Beck in view of Prahlad (US 2001/0047289).

Regarding claims 18-22, Beck does not explicitly teach that the mass storage device and email server are physically separated. Prahlad teaches a storage device and an email device being physically separated in figures 1-3 and paragraph 0009 and 0024. At the time the invention was made, one of ordinary skill in the art would have been

Art Unit: 2143

motivated to separate the email server and the storage device because by separating the storage, the email system operates more efficiently since the attachments are not transferred unless specifically requested by users [0024].

Response to Arguments

Applicant's arguments have been fully considered and are persuasive. However, upon further consideration, a new ground(s) of rejection is made in view of Beck.
